

Research Seminars and Journal Clubs in molecular medicine

Spring 2009 program

Biomedicum I, 5th floor,
Seminar Room 7-8, Tuesdays at 12.15-13.15

| | Date | Speakers | Title | Commentators |
|--------|-------|-----------------------|--|-----------------------|
| RS | 13.1. | Tiina Järvinen | Genetic studies on Finnish lupus erythematosus patients | Jaakko Kaprio |
| JC | 20.1. | Mari Kaunisto | | |
| RS | 27.1. | Linda Mustelin | Physical activity reduces the influence of genetic effects on BMI and waist circumference | Kaisa Valli-Jaakkola |
| JC | 3.2. | Katriina Tiira | | |
| RS | 10.2. | Pirkka-Pekka Laurila | Biological Pathways behind Low HDL | Emma Nyman |
| JC | 17.2. | Virpi Leppä | | |
| RS | 24.2. | Mia Schmieidt | Molecular characterization of NCL protein CLN5 | Elisabet Einarsdóttir |
| JC | 3.3. | Jarkko Soronen | | |
| STAT | 10.3. | Janne Pitkäniemi | Challenge of multiple testing | |
| JC | 17.3. | Otto Manninen | | |
| RS | 24.3. | Helena Kilpinen | Pathway analysis of genome-wide association and transcript profile data in autism spectrum disorders | Anna But |
| JC | 31.3. | Hanna-Reetta Lajunen | | |
| RS | 7.4. | Kirsi Alakurtti | Genome-wide screen for copy number variation in migraine | Aija Kyttälä |
| JC | 14.4. | Michael Backlund | | |
| STAT | 21.4. | Emmi Tikkanen | Latent variable models for genomewide analysis of complex traits | |
| RS | 28.4. | Tiinamaija Tuomi | Monogenic forms of diabetes | Karri Silventoinen |
| RS | 5.5. | Ville Pulkkinen | ELMOD2, a candidate gene for idiopathic pulmonary fibrosis | Juho Wedenoja |
| JC | 12.5. | Elisabet Einarsdóttir | | |
| ETHICS | 19.5. | Ritva Halila | Ethical issues on genetic research | |
| JC | 26.5. | Mette Andersen | | |
| RS | 2.6. | Tobias Freitag | Mechanisms that underlie loss of antigen tolerance in HLA class II associated autoimmune diseases | William Hennah |
