

## Appendix A17. Data transfer check forms

### DATA TRANSFER CHECK FORM FOR BASELINE QUESTIONNAIRE 1 DATA

To make sure that we interpret your data correctly, we would like you to fill out this form for us. Please fax it to the coordinating center at the same time as you send your data.

Also, remember to send summary statistics (n, mean, standard deviation, minimum and maximum) for all variables and frequencies for all categorical variables. You can send the output file of the statistical software you use for these summary statistics and frequencies.

The fax number is: National Public Health Institute  
Unit of Environmental Epidemiology  
Pekka Tiittanen  
+358 17 201265

Assumption	Fill out "yes" if correct. Explain what else if not correct.
We have used the order and coding of the variables as told in the appendices A14 and A15 of ULTRA II study manual.	
We have checked the data according to ULTRA II study manual (chapter 6.5.1, Data validation and verification).	
The error rate of data entry was (if 10% double entry was done):	%

## DATA TRANSFER CHECK FORM FOR BASELINE QUESTIONNAIRE 2 DATA

To make sure that we interpret your data correctly, we would like you to fill out this form for us. Please fax it to the coordinating center at the same time as you send your data.

Also, remember to send summary statistics (n, mean, standard deviation, minimum and maximum) for all variables and frequencies for all categorical variables. You can send the output file of the statistical software you use for these summary statistics and frequencies.

The fax number is: National Public Health Institute  
Unit of Environmental Epidemiology

Assumption	Fill out "yes" if correct. Explain what else if not correct.
We have used the order and coding of the variables as told in the appendices A14 and A15 of ULTRA II study manual.	
We have checked the data according to ULTRA II study manual (chapter 6.5.1, Data validation and verification).	
The error rate of data entry was (if 10% double entry was done):	%

## DATA TRANSFER CHECK FORM FOR DIARY DATA

To make sure that we interpret your data correctly, we would like you to fill out this form for us. Please fax it to the coordinating center at the same time as you send your data.

Also, remember to send summary statistics (n, mean, standard deviation, minimum and maximum) for all variables and frequencies for all categorical variables. You can send the output file of the statistical software you use for these summary statistics and frequencies.

The fax number is: National Public Health Institute  
Unit of Environmental Epidemiology  
Pekka Tiittanen  
+358 17 201265

Assumption	Fill out "yes" if correct. Explain what else if not correct.
We have used the order and coding of the variables as told in the appendices A14 and A15 of ULTRA II study manual.	
We have checked the data according to ULTRA II study manual (chapter 6.5.1, Data validation and verification).	
The error rate of data entry was:	%

## DATA TRANSFER CHECK FORM FOR CLINIC VISIT QUESTIONNAIRE DATA

To make sure that we interpret your data correctly, we would like you to fill out this form for us. Please fax it to the coordinating center at the same time as you send your data.

Also, remember to send summary statistics (n, mean, standard deviation, minimum and maximum) for all variables and frequencies for all categorical variables. You can send the output file of the statistical software you use for these summary statistics and frequencies.

The fax number is: National Public Health Institute  
Unit of Environmental Epidemiology  
Pekka Tiittanen  
+358 17 201265

Assumption	Fill out "yes" if correct. Explain what else if not correct.
We have used the order and coding of the variables as told in the appendices A14 and A15 of ULTRA II study manual.	
We have checked the data according to ULTRA II study manual (chapter 6.5.1, Data validation and verification).	
The error rate of data entry was:	%

## DATA TRANSFER CHECK FORM FOR CLINIC VISIT LOG BOOK DATA

To make sure that we interpret your data correctly, we would like you to fill out this form for us. Please fax it to the coordinating center at the same time as you send your data.

Also, remember to send summary statistics (n, mean, standard deviation, minimum and maximum) for all variables and frequencies for all categorical variables. You can send the output file of the statistical software you use for these summary statistics and frequencies.

The fax number is: National Public Health Institute  
Unit of Environmental Epidemiology  
Pekka Tiittanen

Assumption	Fill out "yes" if correct. Explain what else if not correct.
We have used the order and coding of the variables as told in the appendices A14 and A15 of ULTRA II study manual.	
We have checked the data according to ULTRA II study manual (chapter 6.5.1, Data validation and verification).	
The error rate of data entry was:	%

## DATA TRANSFER CHECK FORM FOR MEDICATION SHEET DATA

To make sure that we interpret your data correctly, we would like you to fill out this form for us. Please fax it to the coordinating center at the same time as you send your data.

Also, remember to send summary statistics (n, mean, standard deviation, minimum and maximum) for all variables and frequencies for all categorical variables. You can send the output file of the statistical software you use for these summary statistics and frequencies.

The fax number is: National Public Health Institute  
Unit of Environmental Epidemiology  
Pekka Tiittanen  
+358 17 201265

Assumption	Fill out "yes" if correct. Explain what else if not correct.
We have used the order and coding of the variables as told in the appendices A14 and A15 of ULTRA II study manual.	
We have checked the data according to ULTRA II study manual (chapter 6.5.1, Data validation and verification).	
The error rate of data entry was (if 10% double entry was done):	%

## DATA TRANSFER CHECK FORM FOR SPIROMETRY DATA

To make sure that we interpret your data correctly, we would like you to fill out this form for us. Please fax it to the coordinating center at the same time as you send your data.

Also, remember to send summary statistics (n, mean, standard deviation, minimum and maximum) for all variables and frequencies for all categorical variables. You can send the output file of the statistical software you use for these summary statistics and frequencies.

The fax number is: National Public Health Institute  
Unit of Environmental Epidemiology  
Pekka Tiittanen
